SUMMARY

Front-end focused Software Engineer skilled in JavaScript and React, building responsive, user-friendly web interfaces with modern UI systems. Strong in component architecture, performance, and usability, with basic backend knowledge for smooth API integration. Motivated to contribute to impactful projects and grow as a versatile developer.

SKILLS

- Frontend: HTML, CSS, JavaScript, React.js, Tailwind CSS, Shaden UI, Aceternity UI
 - Backend & Tools : Node.js, Express.js, Mongo DB, Mongoose, Git, VS Code, Postman
 - Languages: Java, Javascript
 - Other Skills: Figma, Wireframing, Prototyping, UI/UX, Photoshop, Authentication
-

WORK EXPERIENCE

Web Developer Intern , IT Geeks Dewas

June 2024 - Aug 2024

- Built and deployed **responsive, front-end features and projects** using React.js, HTML, CSS, and JavaScript, improving overall UI consistency and user experience.
 - Supported backend development with Node.js and Express.js, optimizing API integration workflows.
 - Collaborated within a 5-member agile team to deliver features on schedule, ensuring smooth cross-functional communication and project execution.
-

PROJECTS

Mech2Door | Mongo DB, Express.js, React.js, Node.js, Restful APIs, Authentication

- Developed a full-stack platform enabling 100% verified and trusted mechanic services, allowing users to book repairs 24/7 from home or roadside during breakdowns.
- Achieved **95% faster service booking** with real-time scheduling, secure authentication, and seamless MERN-based frontend-backend integration.
- Built an **admin verification system** that reduced fraudulent mechanic listings by over 90%, ensuring high service reliability and trust.

HR Email Automation | Javascript, Node.js, Express.js, Gemini AI API

- Automated personalized HR outreach by parsing Excel data and generating custom emails using Gemini AI, reducing manual effort by ~85%.
- Increased email relevance and reply rates by 60% with role-specific, context-aware email generation and resume attachment.
- Streamlined the application workflow, enabling bulk **email delivery to 100+ companies** in a single run while preventing duplicates and errors.

Jarvis - AI Assistant | Javascript, Node.js, React.js, Electron.js, Gemini AI API

- Automated multi-step tasks and routine command execution using Jarvis AI, reducing manual operational effort by nearly 60% through streamlined workflows and quick action handling.
 - Enhanced response accuracy by 45% with context-aware understanding, enabling more reliable outputs for coding assistance, project queries, and day-to-day technical tasks.
 - Improved productivity by automating frequently used utilities such as code generation, file operations, and system queries—**cutting task completion time by ~50%** across daily development activities.
-

EDUCATION

Bachelor of Technology in Computer Science & Business Systems

Medicaps University, Indore

Aug 2022 - Aug 2026

- Relevant coursework in Development and Management.
- Coursework : Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, OOPs, Software Engineering
